# SquaredUp

"The revolutionary tool that has single-handedly modernized SCOM"

PRODUCT BRIEF: SCOM EDITION

Unleash the power of SCOM

Bring all your rich SCOM data to life with intuitive and dynamic SquaredUp dashboards. SquaredUp unlocks SCOM with insightful visualizations and drilldowns so you and your team can see the health of your infrastructure and diagnose performance issues fast.

Get visibility for proactive action

SquaredUp dashboards give you real-time, root cause analysis for your infrastructure and applications so you can reduce your MTTR and hit your SLOs. Don't let issues impact the business.

Effortlessly surface data from SCOM

SquaredUp natively connects to SCOM's object model to surface valuable data in 1-click dashboards on top of SCOM. Choose out-of-the-box dashboards based on installed Management Packs or custom build your own.

Visualize application status for the business

SquaredUp enables you to monitor your enterprise applications as well as your infrastructure. Automatically discover and map your applications and troubleshoot server connections with SquaredUp's Visual Application Discovery and Analysis (VADA).

Extend SCOM as your single pane of glass

Bring together all your data from any tool alongside your SCOM data into insightful dashboards. Connect to any data with PowerShell, Web API, and more in SquaredUp to visualize your infrastructure and applications from end to end. Know exactly where to look when things go wrong. *"Everything we need to diagnose performance issues and drill down"*

Get up and running in 5 minutes

Install SquaredUp and build insightful dashboards in just minutes. Use the customizable, out-of-the-box templates or create your own from scratch with the intuitive dashboard designer. No new databases, Windows Services, or agents needed.
